

# Frontend Developer - React.js, JavaScript, TypeScript, Redux

---

## Qualifications

- A degree in **Software Engineering, Computer Science, or Information Technology**.
  - Strong proficiency in **React.js** and **modern JavaScript (ES6/ESNext)**.
  - Experience working with **TypeScript** and **state management libraries** such as **Redux, Context API, or Recoil**.
  - Hands-on experience in **building and optimizing responsive UI/UX**.
  - Understanding of **RESTful APIs and GraphQL integration**.
  - Knowledge of **modern frontend build tools** such as Webpack, Babel, Vite.
  - Familiarity with **CSS pre-processors (SASS, SCSS, LESS)** and **utility-first frameworks (Tailwind CSS, Bootstrap, Chakra UI, Material-UI)**.
  - Proficiency in **Git version control** and working with GitHub, GitLab, or Bitbucket.
  - Understanding of **Progressive Web Applications (PWAs)** and **Server-Side Rendering (Next.js)**.
  - Experience working with **Docker and Kubernetes** is a plus.
  - Ability to **collaborate in a distributed team setup** with global teams.
  - Strong understanding of **browser rendering, performance tuning, and cross-browser compatibility**.
- 

## Required Skills

- **3+ years of experience** in frontend development using **React.js**.
  - Proficiency in **HTML5, CSS3, and JavaScript (ES6/ESNext)**.
  - Strong understanding of **React lifecycle methods, hooks, and functional components**.
  - Experience with **state management libraries** such as **Redux, Zustand, Context API**.
  - Proficiency in **React Router** for navigation and routing in SPAs.
  - Experience working with **RESTful APIs and GraphQL queries** using **Axios or Apollo Client**.
  - Hands-on experience in **unit testing and integration testing** using **Jest, React Testing Library, or Cypress**.
  - Knowledge of **component-based design principles** and **atomic design methodologies**.
  - Familiarity with **Headless CMS frameworks** like Strapi or Contentful.
  - Understanding of **authentication mechanisms**, including **OAuth, JWT, Firebase Authentication**.
  - Experience in **performance optimization** techniques such as lazy loading, code splitting, and memoization.
  - Ability to write **clean, maintainable, and well-documented code**.
  - Familiarity with **real-time data handling** using WebSockets or Firebase Firestore.
  - Experience working with **Figma, Adobe XD, or Sketch** to translate UI designs into code.
  - Experience with **Next.js framework** is an added advantage.
  - Strong problem-solving skills and ability to troubleshoot UI/UX issues efficiently.
  - Experience in **unit testing React components** using Jest and React Testing Library.
- 

## Experience

- **3+ years of experience** in frontend development using **React.js** and **JavaScript (ES6/ESNext)**.
- Experience in **building scalable, high-performance web applications**.

- Hands-on experience with **CSS frameworks like Tailwind CSS, Material-UI, Bootstrap.**
  - Strong experience in **integrating third-party libraries, APIs, and SDKs.**
  - Experience in **CI/CD pipelines** for frontend deployments using **GitHub Actions, Jenkins, or GitLab CI/CD.**
  - Understanding of **server-side rendering (SSR) and static site generation (SSG) using Next.js.**
  - Experience in developing **enterprise-level web applications** using microfrontend architecture.
  - Familiarity with **cloud-based deployments** such as AWS Amplify, Netlify, Vercel, or Firebase Hosting.
  - Experience in **converting Figma or Sketch designs** into **pixel-perfect React components.**
  - Knowledge of **progressive enhancement techniques** for better accessibility and user experience.
- 

## Duties & Responsibilities

- **Develop and maintain frontend applications** using **React.js, TypeScript, and modern JavaScript.**
  - **Build and optimize UI components** with reusable, scalable, and modular architecture.
  - **Collaborate with UI/UX designers** to translate wireframes and mockups into responsive, accessible user interfaces.
  - **Write clean, maintainable, and well-documented code** following best practices and coding standards.
  - **Optimize frontend performance** using lazy loading, memoization, and code splitting techniques.
  - **Ensure cross-browser compatibility and responsive design** using modern CSS frameworks.
  - **Integrate RESTful APIs and GraphQL endpoints** with efficient state management.
  - **Participate in Agile development cycles**, including sprint planning, daily stand-ups, and retrospective meetings.
  - **Perform unit testing and integration testing** to ensure frontend stability and maintainability.
  - **Debug and resolve performance bottlenecks**, memory leaks, and rendering issues.
  - **Implement authentication and authorization mechanisms** for user access control.
  - **Develop reusable component libraries and design systems** for scalable frontend architecture.
  - **Collaborate with backend engineers, DevOps teams, and product managers** to ensure seamless integration of features.
  - **Work on accessibility improvements** following **WCAG (Web Content Accessibility Guidelines).**
  - **Monitor and analyze application performance metrics**, using tools like **Google Lighthouse, Web Vitals, or New Relic.**
  - **Stay updated with the latest trends and advancements** in frontend development and modern JavaScript frameworks.
  - **Mentor junior developers** and conduct peer code reviews to ensure code quality and maintainability.
- 

## Job Description

We are seeking a **highly skilled Frontend Developer (React.js)** to join our team and contribute to the development of **modern, interactive, and scalable web applications.**

As a **React.js Developer**, you will work closely with **product managers, designers, and backend engineers** to develop high-quality user interfaces, ensuring **seamless performance, accessibility, and great user experience.**

This role requires **expertise in React.js, JavaScript (ES6/ESNext), TypeScript, CSS frameworks, and API integration.** You will be responsible for **writing clean, maintainable, and efficient code**, as well as improving **performance and responsiveness** of web applications.

You will also be involved in **architectural decisions, UI/UX enhancements, and frontend optimizations**, ensuring a **fast, responsive, and visually appealing user experience**.

If you have a **passion for frontend development, UI/UX design, modern web technologies, and best practices**, we encourage you to **apply today!**

---

## Why Join Us?

- ✓ **Work on cutting-edge frontend technologies** (React.js, Next.js, GraphQL, Tailwind CSS).
- ✓ **Collaborate with an innovative and dynamic team** of engineers, designers, and product managers.
- ✓ **Competitive salary and benefits package.**
- ✓ **Opportunities for career growth and skill development.**
- ✓ **Flexible work environment**, including remote work options.
- ✓ **Engage in Agile development practices** with sprint-based planning.
- ✓ **Get exposure to modern CI/CD pipelines and cloud deployments.**
- ✓ **Develop scalable, high-performance web applications** used by thousands of users.
